

BUDAPEST
INSTITUTE

The Budapest Institute and Public (Budget) Data

Petra Edina Reszkető, Co-Founder, Director

Budapest Institute for Policy Analysis

2017

who we are

Independent think tank (2008-)

- **Mission:** contributing to public policy making both in Hungary and the EU grounded in research evidence and promoting evidence-informed public discourse and policy debates
- **Activity:** producing public policy analyses and impact assessments to assist the planning, monitoring and evaluation of policy interventions
- **Facts:** economists and political scientist (12, full-time eq.), own office (210m²), EUR 400.000 annual turnover (2016)

what we do

- Evaluation and impact assessment of public policy programmes in the fields of:
 - Employment and social policy
 - SME policy/ entrepreneurship and business environment
 - Education and health
 - Open government and better regulation
- Working with government data (incl. budget data)
- Mining, cleaning and analysing specific datasets managed by government agencies
- Advising policy makers and data holders in the public sector

what we do

Specific Analysis of administrative burden in the business sector

Data: Ministry of Economy - survey data

Hungarian Competition Authority

What do they promise?

(2010, 2014) Data: party election programmes

Civil initiative

Transparency of municipality-owned enterprises in HU and in the V4 countries

Data: website content analysis, indexing

Visegrad Foundation

Transparency of state-owned enterprises in HU

Data: website content analysis, indexing

Open Society Foundation

Our Money! Visualization of the Hungarian budget

Data: national budget data

Open Society Institute

Transparency and accountability in national budget/ in public procurement

Data: stakeholder survey, media & admin.data

IBP, Visegrad Fund

Fiscal transparency in Hungary – A stakeholder analysis

Data: survey, conten analysis

Internaitonal Budget Partnership

Monitoring of Open Government Action Plan of Hungary

Data: admin.data, interviews

OGP Independent Report Mechanism

Impact assessment of SME-development measures (ERDF, GOP 2.1.1.)

Data: NDA, State Tax Authority; admin.data

NDA

Assessment of the business environment development initiatives

Data: Ministry of Economy; firm-level data

National Development Agency

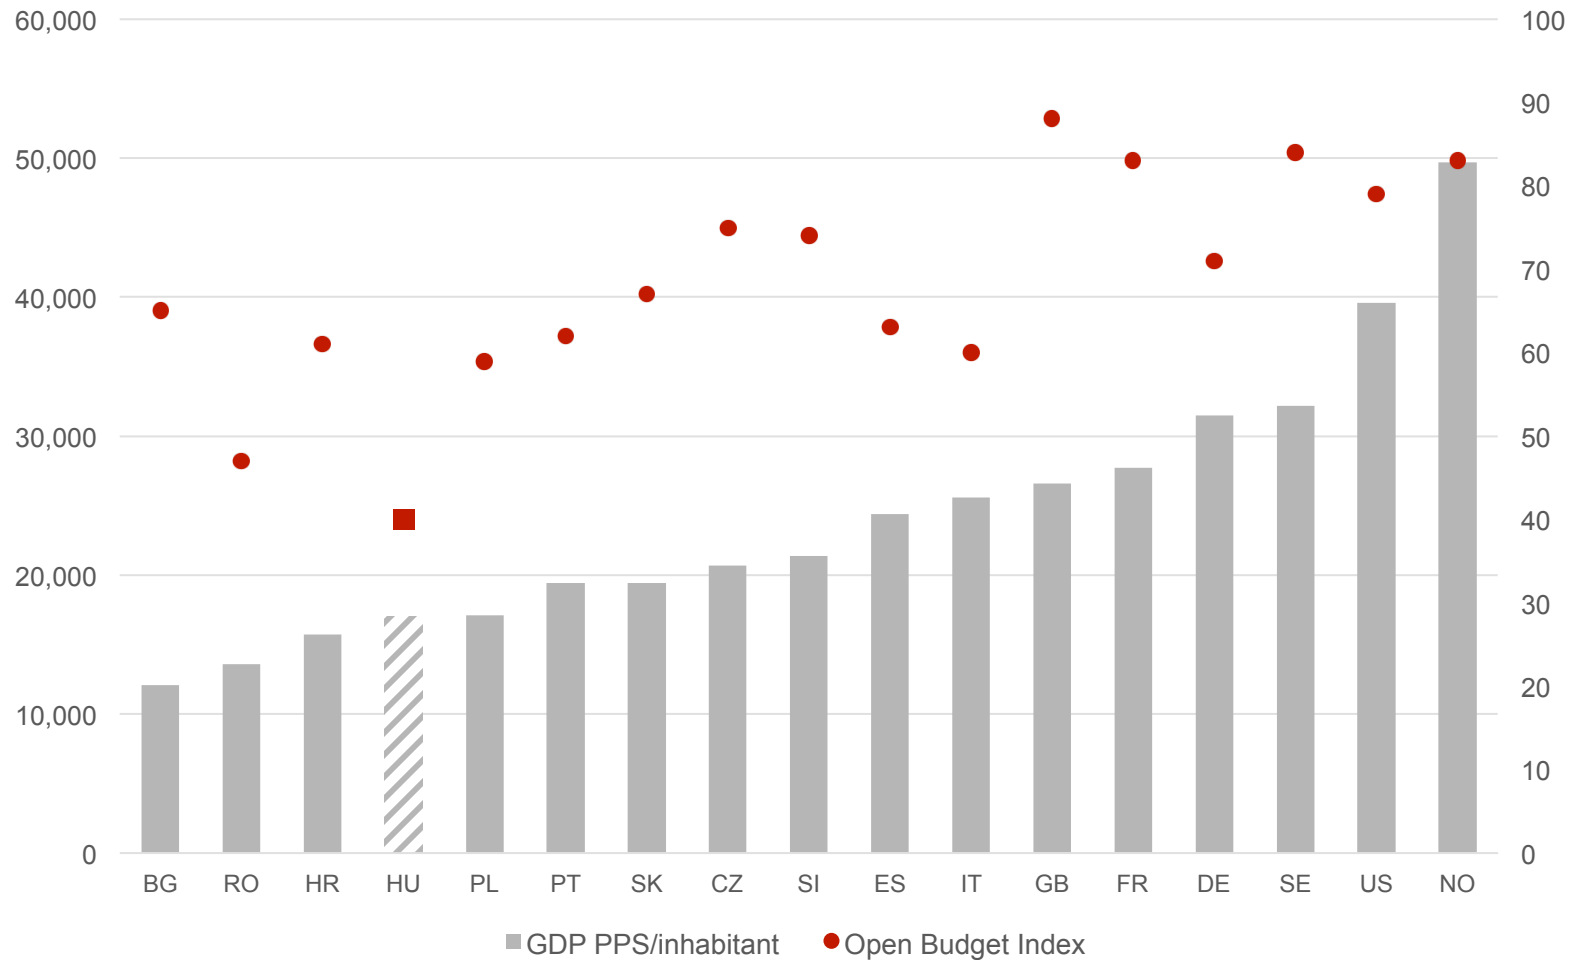

The Open Budget Index 2015

government effectiveness and open budget

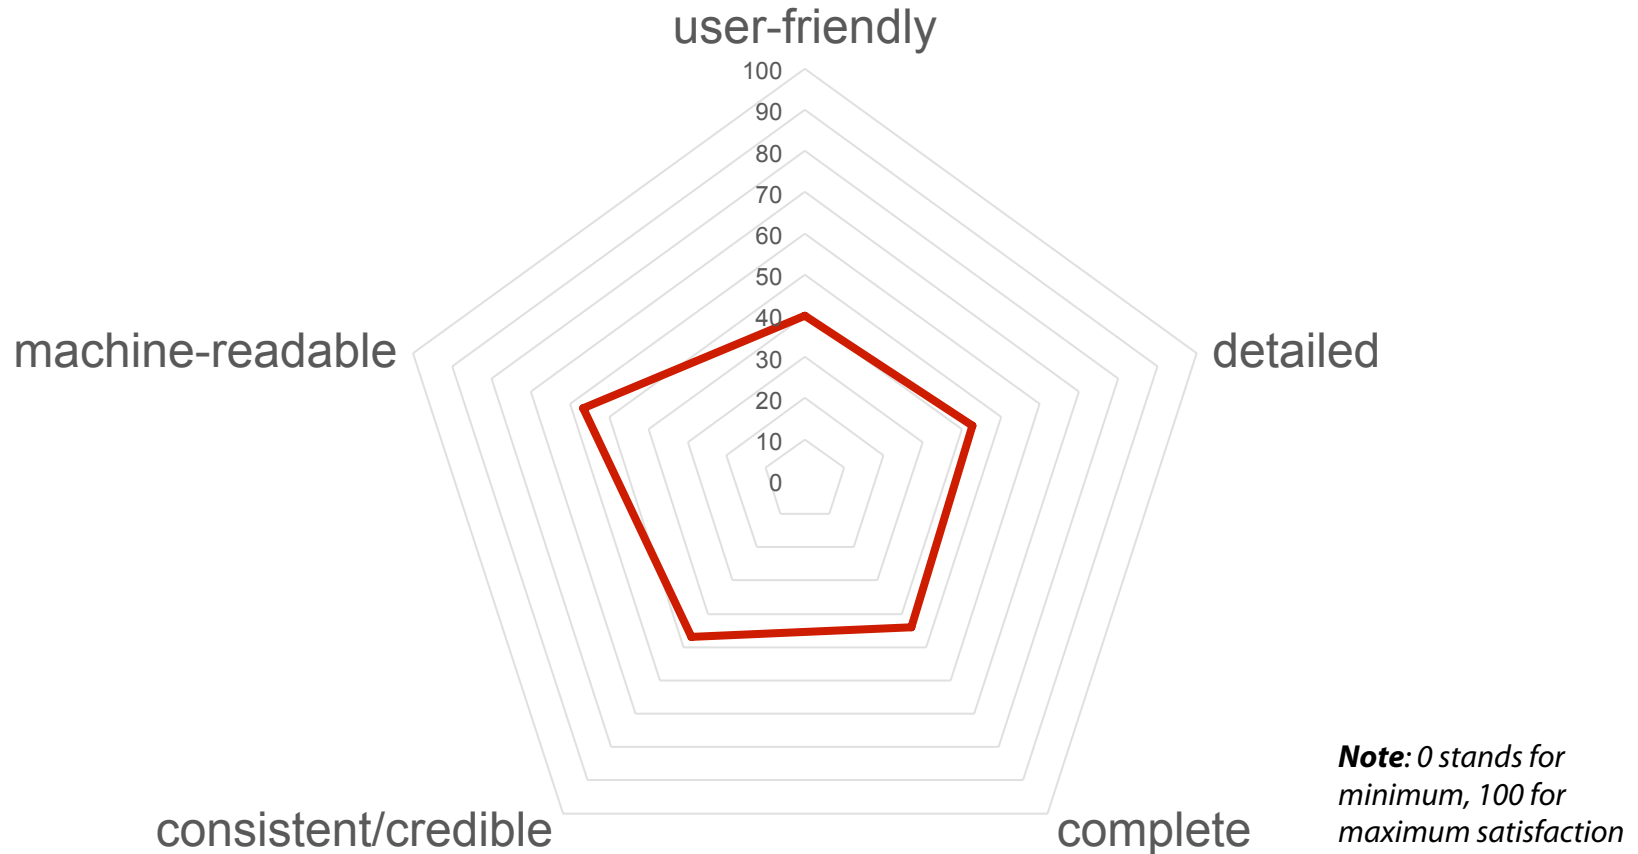

economic development & open budget

what we missed, 2014

Document	Current Status	Date of Publication	Next Publishing Period
Pre-Budget Statement	● Not produced	Unavailable	Before 30 Nov 2014
Executive's Budget Proposal	● Publicly available	30 September 2013	Before 31 Dec 2014
Enacted Budget	● Publicly available	21 December 2013	Before 31 Mar 2015
Citizens Budget	● Not produced	Unavailable	Same as either the Executive Budget Proposal or Enacted Budget.
In-Year Report	● Publicly available	21 August 2014	Publishing period for each report is one to three months after a particular month/quarter ends.
Mid-Year Review	● Not produced	Unavailable	Before 31 Dec 2014
Year-End Report	● Publicly available	29 August 2013	Before 31 Dec 2014
Audit Report	● Publicly available	29 August 2014	Before 30 Jun 2015

what we missed, 2014

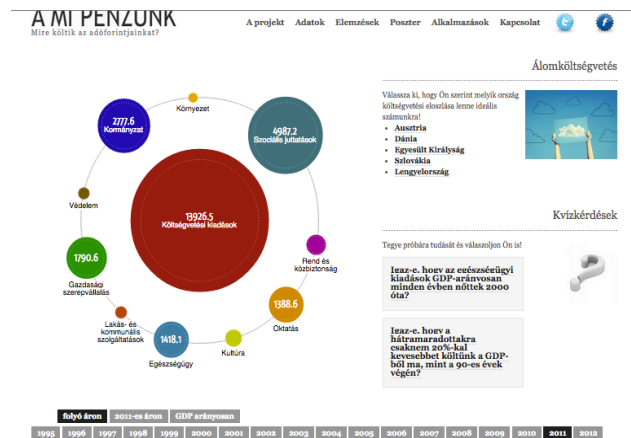

what we wanted to achieve – Our Money!

- to publish budget data in an easy-to-understand way
- share information on what is it spent for (*COFOG*)
- to help citizens/ journalists to understand spending items and budget tradeoffs
- to encourage problem-oriented data mining and analysis

what we did – Our Money!

- interactive online visualisation
 - **www.amipenzunk.hu**
 - historical database (1996-2013)
 - posters
 - small stories
 - teaching materials (v1.0)
 - interactive gadgets (quiz, „dream budget”)
- **target groups: secondary school teachers, journalists (collaborative workshops)**

what we've faced - challenges

- **Access to data:** neither easy nor quick
- **Data quality:** lack of machine readable formats (.csv), lack of functional breakdown of budget data, time-inconsistencies
- **Professional knowledge:** “translation” of the numbers & extensive cleaning, additional data-gathering/-linking
- **IT trade-offs:** “*free but fixed*”, difficulties in adapting open-source data visualization tool to specific needs

what we've learned - lessons

- **Ownership and motivation:** government agencies who use the data for analysis themselves tend to be more cooperative (*State Treasury*)
- **Participatory approach:** engaging with representatives of the main target groups / users, meeting their interests & questions
- **Web/IT development:** long, meticulous, iterative process, *3 (work in small steps, with strict deadlines!)
- **Budget visu is sexy but only one shot:** difficulties in keeping people's interest 'alive' (10000 unique visitors / day down to dozens w/in weeks)

what we would prefer - recomms

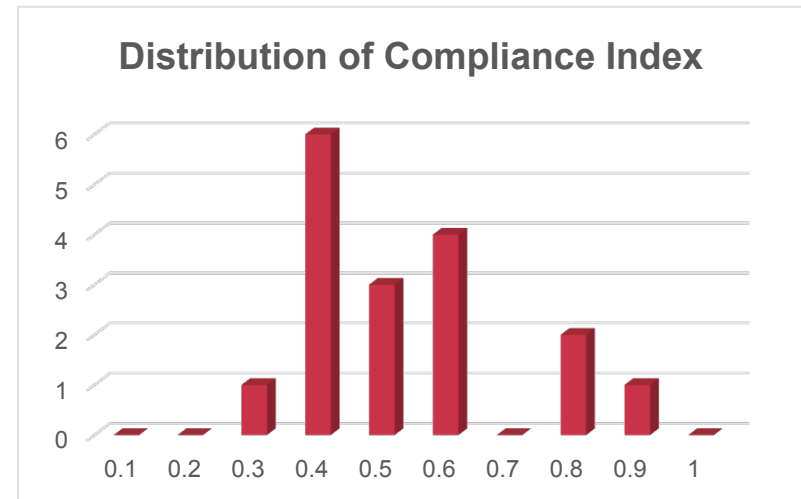

- ✓ *Go local!*
- ✓ *Link data to public services /quality of services in the focus of local communities!*
- ✓ *Start small and see how far it can be mainstreamed (one community for first step)*
- ✓ *Team up with local advocacy groups, activists!!*

what we've faced - challenges

Complete ignorance: lack of information & minimum capacities

“One of our colleagues is taking care of our webpage, though this is not her main task.” (CEO of a small company)

Aversity to disclosure: misunderstandings, overestimating the political risks

“What is the purpose of disclosures ... it can appear in the tabloids and the public can chew on it” (CFO of a medium-sized company)

what we've faced - challenges

Law-abiding but not strategic: unaware of the strategic values & benefits

“In terms of transparency, we are fully in compliance with the law. As a lawyer, I couldn't say anything else.” (CEO of a medium-sized company)

“Our ethical code determines our business conduct and teaches us in how to respect our clients, our business partners in order to do the best in our job. We did not find it though important to publish on the website” (CEO of the largest local company)

what we've learned - lessons

- **Need for awareness raising:** transparency as first step towards corporate integrity, inherent business values (leading to goodwill/ profitability gains)
- **Need for tailor-made consultancy:** checklists, “low hanging fruits” (e.g. single window, cross-linking, max. two-clicks)
- **Yardstick competition:** regular ranking helps benchlearning

what we would prefer - recomms

- ✓ *Rank local transparency in a comprehensive way (municipality, MOEs – composite indexes)*
- ✓ *Pilot in couple of municipalities, linked also to consultancy*
- ✓ *Provide specific support*
- ✓ *Team up with local advocacy groups (media, activists)*
